Zero Suit Samus Data Project Report

Title and Description:

The title of my website is ZSS Data, which stands for Zero Suit Samus Data. ZSS is a character from the game series Super Smash Brothers. In the competitive scene, also known as esports, she is a very complex character. On the home page, I go over the description of her, where she came from and from what game. Then i talked about what she was like in previous titles in smash. I then talk about how she is in the new game, her strengths as a character. Finally, I mention specific top players that play her internationally. The other pages focus on her specific moves, detailing why they are good and what they can be used for. These pages include normals, aerals, and special moves. I go into great detail on each specific move, and have diagrams of how the move looks in motion.
